

Fifth Grade Science

Standard 1—Students will understand that chemical and physical changes occur in matter.

Standard 2—Students will understand that volcanoes, earthquakes, uplift, weathering, and erosion reshape Earth's surface.

Standard 3—Students will understand that magnetism can be observed when there is an interaction between the magnetic fields of magnets or between a magnet and materials made of iron.

Standard 4—Students will understand features of static and current electricity.

Standard 5—Students will understand that traits are passed from the parent organism to their offspring, and that sometimes the offspring may possess variations of these traits that may help or hinder survival in a given environment.
